Summary

I created this mount to film the scenes while riding a motorbike. Need to attach 8pcs of D8mmx3mm magnets on the back

I created this mount to film the scenes while riding a motorbike. You can also use this model to keep the camera in place in front of your shirt, it's a nice angle for your footages.

I export the model as high-poly AMF with 966382 polygons in total. It would be a very nice model with such a high-polygons

Just few supports are needed above the magnet holes. To have the best quality, you can set the layer height to .2 or .15 , material using PLA or PETG is up to the enviroment around you.

Need to attach 8pcs of D8mmx3mm magnets on the back.

Enjoy your print. Have a nice day !
