Description

GoPro Travel Case with space for x2 batteries and x2 microSD cards

If you'd like to buy me a coffee to show your appreciation you can do so here: buymeacoffee.com/Vanwillla

Change log:

24/02/2025 - V2 version updated with improved snap fit to increase lid security and added debossed logo variant of lid for those that want a logo but without needing to print via multi-material

About

Compatible with GoPro Hero 13, 12, 11, 10 and should also fit GoPro Hero 5, 6, 7, 8 & 9. Contains space for x2 spare batteries and microSD cards and shuts with a snap fit mechanism to keep it closed in a bag. The lid holds itself in the fully open position for easy access.

Fully printable, no screws, springs or nuts required!

Assembly

1. Gently ease the snap fit into the case until you hear a 'click'. No glue required.
2. Assemble the lid onto the body. Use the snap fit to aid locating the parts together.
3. Making sure that you orient the flat section of the pivot correctly onto the corresponding flat on the lid - Press fit the pivot into the lid and body, using a piece of plastic to ensure they sit flush if required.
4. **Optional:** There is enough clearance to add thin foam pads between the lens & screen and the case if desired.

Material selection

I'd recommend making the snap fit and pivot from PETG at least but feel free to try it out if you're feeling brave! The model pictured is PLA for white and green parts, the grey pivot & snap fit is PETG.

Print Files

Print files contain two options for the lid, one with the muti-body logo and colour accent and one that is all one body.

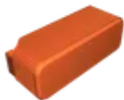

I'm sure I'll post updates once I've been using it more so feel free to tell me what you think!
