GoPro head mount with EXACT dimensions for any GoPro adapter.

- holder itself is massive on both sides - this is IMPORTANT against other adapters - not to be broken during adventures (as it happened to me usually with original holder).
- holder has good shape for camera being mounted in various of angles (look forward, looking down on the face aswell)
- the missing square is just for filament save
- based on <https://www.prusaprinters.org/prints/65294-gopro-mount-base-import-this-into-your-gopro-mount> but given mount base was needed to be adjusted alot for wide variety of angles on the head (but those exact dimensions for screw are nice!)

This remix is based on

GoPro Mount Base (import this into your GoPro Mount design)
